

NEBULA CONQUEST — 12 prompts d'images pour la Chronique

Chaque prompt est **complet** : il suffit de le copier-coller tel quel dans ton outil d'images IA. Le style commun est déjà inclus dans chacun, pour que les 12 images se ressemblent.

- **Format** : 16:9 (paysage). Avec Midjourney, ajoute `--ar 16:9` à la fin du prompt.
- **Noms des fichiers** : `scene01.jpg` à `scene12.jpg`.
- **Prompt négatif** (si ton outil a une case « à éviter ») :

`text, letters, words, logo, flag, emblem, watermark, signature, blurry, low quality, deformed hands, extra fingers, cartoon, anime`

scene01 — Le futur radieux

`Cinematic wide shot of a breathtaking futuristic French city in the year 2387, elegant glass and white stone towers with Haussmann-inspired balconies, flying vehicles and glowing walkways, warm lights in every window, but the sky above is blood red and the ground is cracked and dry, dust storms rising on the horizon, beauty and ruin side by side, epic science fiction digital painting, deep navy shadows, violet and teal haze, warm golden accents, soft volumetric light, painterly texture, highly detailed, dramatic composition, 16:9, no text, no logos, no flags`

scene02 — La fin du monde

`Planet Earth seen from orbit, dying, its surface brown and rust colored, oceans dried up into pale salt basins, swirling grey ash clouds, faint glowing city lights still visible on the night side, a few abandoned space stations drifting nearby, melancholic and silent, epic science fiction digital painting, deep navy blue space (#16264E), violet and teal nebula haze in the background, soft volumetric light, painterly texture, highly detailed, 16:9, no text, no logos`

scene03 — La découverte

`Inside a high-tech laboratory at night, a tall glass capsule glowing in the center, a calm human silhouette inside gently dissolving into thousands of tiny glowing blue-white spores that float upward like phosphorescent pollen, a few scientists in long coats watching in awe, reflections on polished floors, blue and violet light, wonder and strangeness, cinematic science fiction digital painting, warm golden accents, soft volumetric light, painterly texture, highly detailed, 16:9, no text, no logos`

scene04 — Les partis s'en emparent

`A grand futuristic parliament hemicycle in total chaos, rows of politicians in elegant suits of different colors (red, blue, green, violet, orange) standing up, arguing and gesturing dramatically, floating holographic screens showing star maps, papers flying, a huge round window showing a red dying sky, epic yet slightly comical, cinematic science fiction digital painting, deep navy shadows, warm golden accents, soft volumetric light, painterly texture, highly detailed, 16:9, no text, no logos, no flags`

scene05 — Les adhérents font la queue

Huge orderly queues of citizens of all ages waiting patiently in front of giant futuristic machines, each machine bathed in a different colored light (violet, red, green, blue, orange), from the top of each machine a tall column of glowing spores rises into a blood red sky, some people holding membership cards and suitcases, absurd yet epic, cinematic science fiction digital painting, warm golden accents, soft volumetric light, painterly texture, highly detailed, 16:9, no text, no logos, no flags

scene06 — Le grand départ

Cinematic ground-level shot at dusk under a blood red sky. In the foreground, a young mother walks quickly toward a long queue, beaming with joy, a huge excited smile, eyes shining, holding her small child in her arms; the child is crying loudly, tears on its cheeks, mouth wide open, arms reaching back toward home. Behind them, endless orderly queues of citizens with suitcases lead to giant futuristic machines bathed in violet, red, green, blue and orange light, and from these machines countless streams of glowing colored spores rise into the sky like aurora ribbons, an epic exodus of billions above a ruined city. Tragicomic mood, the contrast between the delighted mother and the sobbing child is the focus. Cinematic science fiction digital painting, shallow depth of field on the mother and child, warm golden rim light, violet and teal haze, soft volumetric light, painterly texture, highly detailed, dramatic composition, 16:9, no text, no logos, no flags

Astuce : si l'outil ne rend pas bien les deux expressions, ajoute à la fin the mother is laughing with happiness, the child is crying.

scene07 — La Nébuleuse

Streams of glowing colored spores arriving into a vast nebula, distant suns of different colors and planets scattered across the scene, at the center a black hole with a tilted violet and white accretion disk and a bright lensed arc of light passing above it, thin ring of light around the black sphere, sense of wonder and immense scale, cinematic science fiction digital painting, deep navy blue space (#16264E), violet and teal nebula clouds, warm golden accents, soft volumetric light, painterly texture, highly detailed, 16:9, no text

scene08 — La première colonie

Close view of a small icy moon in space, a cloud of tiny phosphorescent spores gently settling on its surface like glowing snow, bioluminescent networks spreading across the ice in branching patterns, small organic hive-like structures and honeycomb silos starting to grow, a gas giant with rings in the background, peaceful and alive, cinematic science fiction digital painting, deep navy blue space (#16264E), violet and teal haze, warm golden accents, soft volumetric light, painterly texture, highly detailed, 16:9, no text

scene09 — La guerre des partis

An epic space battle between living colonies, glowing streams of spores launched from several planets arcing through space and crossing each other, impacts flashing on planet surfaces, in the foreground a large planet whose surface is split between two living colored territories (violet and orange) fighting for ground in irregular patches, sparks and light trails, cinematic science fiction digital painting, deep navy blue space (#16264E), warm golden accents, soft volumetric light, painterly texture, highly detailed, dramatic composition, 16:9, no text

scene10 — Les Anciens

Three colossal ancient spheres the size of moons, made of engraved dark stone covered with glowing veins and runes, one glowing green, one glowing steel grey, one glowing ember red, slowly emerging from a black hole with a tilted violet accretion disk, debris and light swirling around them, ancient, majestic and a little frightening, cinematic science fiction digital painting, deep navy blue space (#16264E), violet and teal haze, soft volumetric light, painterly texture, highly detailed, 16:9, no text

scene11 — Les alliances d'or

Two planets facing each other across space, one with a violet aura and one with a teal aura, small glowing golden orbs traveling slowly between them in both directions like floating lanterns, a delicate trail of light behind each orb, in the middle one golden orb cracking apart with tiny shards of light, a fragile alliance, cinematic science fiction digital painting, deep navy blue space (#16264E), warm golden accents, soft volumetric light, painterly texture, highly detailed, 16:9, no text

scene12 — À toi, Commandant

Panoramic view of a living nebula filled with dozens of worlds glowing in mixed colors (violet, red, green, orange, blue), a black hole with a violet accretion disk at the center, golden light trails linking some planets, in the foreground one planet lighting up with a bright violet aura as if it is waking up, hopeful, epic call to adventure, cinematic science fiction digital painting, deep navy blue space (#16264E), violet and teal nebula clouds, warm golden accents, soft volumetric light, painterly texture, highly detailed, 16:9, no text
